

Library Management System - Branch & Library Workflow

Hierarchy

Admin (Main Manager) → Branch → Branch Librarian → Libraries → Orders

Example Structure

North Region Branch → Librarian John Smith → Library 1, Library 2, Library 3

South Region Branch → Librarian Rahul Kumar → Library 4, Library 5

Database Tables

Branch: BranchId, BranchName, Address, LibrarianUserId, IsActive, CreatedOn

Library: LibraryId, BranchId, LibraryName, Address, ContactPerson, Email, Phone, IsActive, CreatedOn

Orders: OrderId, LibraryId, BranchId, Status, CreatedOn, ApprovedBy, ApprovedOn

Roles

Admin: Create Branches, Create Branch Librarians, Assign Librarians, View All Orders and Reports.

Branch Librarian: Manage own branch libraries, approve/reject orders, view branch reports.

Order Workflow

Website User → Select Library → Place Order → Pending Approval → Branch Librarian → Approve/Reject → Admin Processing → Shipped

Status Flow

Pending Approval → Approved → Processing → Shipped → Delivered

Development Plan

1. Complete Branch Module
2. Create Library Module
3. Implement Branch Librarian Access Logic
4. Create Orders & Approval Workflow
